SUMMARY

Motivated and detail-oriented Computer Science student with a strong foundation in programming, data structures, and software development. Experienced in building projects using Python, Java, JavaScript and C++, with hands-on knowledge of web and mobile development, databases, and version control. Quick learner with excellent problem-solving skills and a passion for building efficient, scalable solutions. Actively seeking an internship or entry-level opportunity to apply and grow technical skills in a real-world environment.

AWARDS AND HONOURS

- *Dean's List – Semester 1, 3, 4 and 6*
- *Chancellor's Award for Academic Excellence – 2025*

EDUCATION

Universiti Teknologi Malaysia, Kuala Lumpur

July 2025

Diploma in Computer Science: CGPA (3.91/4.0)

EXPERIENCES

- *Developed a full-stack to-do list web application using React, Firebase, and Node.js with user authentication and real-time syncing.*
- *Created a multiplayer game in Unreal Engine 5 using C++ and integrated socket programming for real-time communication.*
- *Designed and developed a personal finance tracker using Python and SQLite to manage budgets and generate monthly spending reports.*
- *Designed a digital voting system prototype using blockchain principles to ensure data integrity and transparency.*
